

# **COMPUTER STUDIES**

## PREAMBLE

This examination syllabus is developed from the National Curriculum for Senior Secondary School Computer Studies. It highlights the scope of the course for Computer Studies examinations at this level. Its structuring revolves around conceptual approach. The major thematic areas considered in the entire syllabus include:

- 1. Computer fundamentals and evolution
- 2. Computer hardware
- 3. Computer Software
- 4. Basic Computer Operations
- 5. Computer Applications
- 6. Managing Computer files
- 7. Developing Problem-solving skills
- 8. Information and Communication Technology
- 9. Computer ethics and human issues

Each thematic area forms a concept which is further divided into sub-concepts. This examination syllabus is not a substitute for the teaching syllabus. Therefore, it does not replace the curriculum.

#### **OBJECTIVES**

The objectives of the syllabus are to test candidates' understanding, knowledge and acquisition of

- 1. basic concepts of computer and its operations;
- 2. manipulative, computational and problem-solving skills;
- 3. application of software packages;
- 4. operation of computer related simple devices;
- 5. on-line skills and their applications;
- 6. safe attitudes and good practices on effective use of computer;
- 7. potential for higher studies in Computer related areas.

#### **EXAMINATION SCHEME**

There will be three papers, Papers 1, 2 and 3, all of which must be taken. Papers 1 and 2 shall be a composite paper to be taken at one sitting.

- **Paper 1:** will consist of 50 multiple-choice objective questions all which are to be answered in 1 hour for 25 marks.
- **Paper 2:** will consist of five essay questions. Candidates will be required to answer any three in 1 hour for 30 marks.
- **Paper 3:** will test actual practical skills of school candidates and knowledge of practical work for private candidates. It will consist of three questions to be answered in 2 hours for 45 marks.

#### **DETAILED SYLLABUS**

ТОРІС	CONTENT	NOTE
COMPUTER EVOLUTION (a) Computing Devices I (Pre- computing age- 19 <sup>th</sup> century)	<ul> <li>(i) Features , components and uses of early computing devices: <ul> <li>Abacus;</li> <li>Slide Rule ;</li> <li>Napier's bone;</li> <li>Pascal's calculator;</li> <li>Leibnitz multiplier;</li> <li>Jacquad loom;</li> <li>Charles Babbage's analytical engine;</li> <li>Hollerith Census Machine;</li> <li>Burrough's Machine.</li> </ul> </li> <li>(ii) Contribution of each of the founder of these devices to modern computers.</li> </ul>	Trend of development in computing devices from one to the other.
(b) Computing Devices II (20 <sup>th</sup> century to date)	Features, components and uses of: -ENIAC -EDVAC -UNIVAC 1 -Desktop Personal Computers -Laptop and Notebook computers -Palmtop.	Sizes and basic components should be considered in a comparative form.

FUNDAMENTALS OF	- Definition of a Computer;	
COMPUTING	- Two main constituents	
(a) Overview of Computing System	of a Computer - Computer hardware; - Computer software - Classification and examples of hardware and software. - Functional parts of a computer	Differences between hardware and software should be treated.
	Characteristics of Computers - Electronic in nature; - Accuracy; - Speed; - Interactive etc.	
(b) Data and Information	<ul> <li>Definition and examples of data and information;</li> <li>Differences between data and information.</li> </ul>	

COMPUTER ETHICS AND HUMAN ISSUES		
Security and Ethics	<ol> <li>Sources of security breaches:         <ul> <li>Virus, worms and Trojan horses;</li> <li>Poor implementation of network;</li> <li>Poor implementation or lack of ICT policies;</li> <li>Carelessness- giving out personal and vital information on the net without careful screening.</li> </ul> </li> </ol>	finition and ects of uses and rms should treated
	had spa sho	finition of ckers and immers ould be ated
	<ul> <li>Exercising care in giving out vital and personal information</li> <li>Encryption</li> <li>Proper Network Implementation and Polies</li> <li>Using sites with web certificates</li> </ul>	olanation of ewall is juired finition of cryption ould be ated
	<ol> <li>Legal Issues</li> <li>-Copyright (software</li> </ol>	

ГГ		1
	copyright)	
	-ownership right to	
	-text;	
	-images;	
	-audio;	
	-video	
	-Privacy of audio and	
	video software	
	-Cyber crimes	
	-identify theft;	
	-internet fraud	
	-Hacking	
COMPUTER HARDWARE		
(a) Input devices	Definition and examples of	
(a) input devices	input devices	
	The use of keyboard,	
	mouse, scanner, joystick,	
	light pen, etc	
	Classification of keys on	
	the keyboard into	
	Function, Numeric,	
	Alphabetic	
	-Cursor keys	
	-Features, function and	
	operation of the mouse	
	-Differences in keyboard,	
	mouse, light pen and	
	scanner	
Output Devices	-Definition and examples	
	-Output devices: monitor,	
	printer, speaker, plotter –	
	Type, features and uses.	
	-Differences between input	Examples and
	and output devices	types of
	-Similarities and	printers and
	differences in inkjet, laser	monitors

treated. **Central Processing Unit** Components of C.P.U.: Combination Arithmetic and logic unit, of the CPU and control unit Memory Unit Function of ALU and as system unit Control Unit should be mentioned. Memory Unit Types of Memory Unit: Primaryand Secondary Physical memory identification of RAM and -Components of Primary memory unit: ROM and ROM devices RAM required. Differences and uses of ROM and RAM Examples of Seconadry memory devices: floppy disk, hard disk, compact disk(CD), flash disk, digitalvideo-disk(DVD) Unit of storage in memory devices: bits, nibble, bytes, kilobytes, megabytes, gigabytes, terabytes Interconversion of unit of Simple storage. calculation -Comparative study of involving the auxiliary storage devices in conversion respect of their size, speed from a unit to and technology another Size and shape variation of floppy, flask/USB and compact disks should be noted

	Logic Circuits		-Definition, types and uses	Logic equation
			of standard logic gate:	for AND, NOT,
			AND, NOT, OR	
				OR gate should be
			Symbols of AND, NOT, OR	
			gates	treated.
			-Construction of truth table	Uses of logic
			for standard logic gates	gates are
			-Differences between AND,	required.
			NOT, OR gates	
			-NAND and NOR as	
			alternative logic gates	
			should be treated	
			Construction of Truth Table	
			for NAND and NOR	
			Construction of a simple	
			comparator with -XOR(	
			Exclusive OR)	Simple
			-NOR gate	definition of a
				comparator is
				required.
	COMPUTER SOFTWARE			
				Differences
(a)	System Software	(i)	Definition and types of	between
			software - System software	system and
			- Application software	application
		(ii)	System software and their	software is
		. ,	examples	required
			- Operating System e.g.	
			MS Windows	
			- Translator e.g. Compiler	
			- Tools/ Utility e.g. Anti-	
			virus	
		(iii)		
			System	Operating
			<ul> <li>MS Windows</li> <li>Linux</li> </ul>	systems of
			- UNIX	-
			- MS-DOS etc	phones, ipad
				and other

		- - (v) Exa Pro	nples of Translators Assemblers Compilers Interpreters mples of Utility grams Editor Anti-virus etc	computerized devices should be treated. E.g. Android, Blackberry, etc. Differences among the
(b)	Operating System	-	Definition, types, examples and function of Operating System Graphic User Interface(GUI) GUI (MS Windows, Linux, etc) Command line (MS DOS, UNIX, etc)	translators should be noted Differences between GUI and Command line Operating Systems are required.
(c)	Application Software	- - - (iii) - - - - -	Definition and types of application software Common Application Packages and their examples Word processing(MS Windows) Spreadsheet(MS Excel) Database(MS Access) Graphics Packages for spreadsheet purpose Accounting software Payroll program Banking software Education management software Statistical packages	Differences between user application program and application packages are required

	-	Hospital management	
		software	
COMPUTER APPLICATION			
(a) Word Processing	(i)	Definition and examples of word processing and word processor -MS Word	
		-Wordstar	
		-WordPerfect	
	(ii)	Features of Word Processing programs in general.	
	(iii)	Application areas of Word Processing programs -Office	
		-Publishing	
		-Journalism	
		-Education, etc.	
	(iv)	Features of MS	
		Word	
	(v)	Steps in activating and exiting MS Word	
	(vi)	Basic operations in MS Word	Definition of
		-Create	each
		- Edit	operational
		- Save	term is
		-Retrieve	required.
		-Print	
		- Close	
	(vii)	Further operations	
		in MS Word	
		-move	
		-сору	
		-cut	
		-use of different	
		Types	
		and sizes of fonts	

	-formatting	
	_	
	-justifying	
	-search/explore	
	-spell checking	
	-file merging, etc	
(b) Spreadsheet	(i) Definition and examples	
	of spreadsheet program	
	-VisiCALC	
	-MS Excel	
	-SuperCALC	
	-Autocad, etc	
	(ii) Feature of	
	spreadsheet program	
	(iii)Application areas of	
	Spreadsheet	
	programs:	
	-Accounting	
	-Statistical	
	calculation	
	-Student result, etc	
	(iv)Features of MS Excel	
	Environment	
	-status bar	
	-menu bar	
	-formula bar, etc	
	(v)Definition of basic	
	terms in MS	
	Excel	
	-worksheet	
	-workbook	
	-cells	
	-cell ranges	
	(vi)Data types in Excel	
	-Number	
	-Labels	
	-Formula	

	(	
	(vii)Basic operation in	
	Excel	
	-Data Entry	Simple
	-Saving	calculations
	-Retrieve	with and
	Сору	without built-
	-Move	in function e.g.
	(viii)Arithmetic	sum, average,
	calculations using	etc
	formula and built-in	
	function	
	(ix)Additional operation	
	in Excel	
	-Editing	
	-Formatting	
	-Printing	
	-Drawing charts, etc	
		Pie chart,
		histogram, bar
		chart, etc
(c) Database	(i)Definition of database	
	()	
	and database packages	
	and database packages	
	and database packages (ii)Examples of database	
	and database packages (ii)Examples of database packages	
	and database packages (ii)Examples of database packages -Dbase IV,	
	and database packages (ii)Examples of database packages -Dbase IV, -Foxbase	
	and database packages (ii)Examples of database packages -Dbase IV, -Foxbase -MS Access	
	and database packages (ii)Examples of database packages -Dbase IV, -Foxbase -MS Access -Oracle, etc	
	and database packages (ii)Examples of database packages -Dbase IV, -Foxbase -MS Access -Oracle, etc (iii)Basic terms in	
	and database packages (ii)Examples of database packages -Dbase IV, -Foxbase -MS Access -Oracle, etc (iii)Basic terms in Database	
	and database packages (ii)Examples of database packages -Dbase IV, -Foxbase -MS Access -Oracle, etc (iii)Basic terms in Database -File	
	and database packages (ii)Examples of database packages -Dbase IV, -Foxbase -MS Access -Oracle, etc (iii)Basic terms in Database -File -Record -Field	
	and database packages (ii)Examples of database packages -Dbase IV, -Foxbase -MS Access -Oracle, etc (iii)Basic terms in Database -File -Record	

methods and their	
features	
-Hierarchical	
-Network	
-Relational	
(v)Features of database	
format	
-Files designed as	
tables	
-Tables comprise	
row and	
columns	
-Row containing	
related	
information	
about a record.	
-Column	
containing	
specific type of	
information	
about a field.	
(vi)Steps in creating	
database	
-define the structure	
-indicate field	
type(numeric,	
character, data,	
text, etc)	
-enter data	
-save data	
(vii)Basic operations on	
already	
created database.	
Database	
-searching	
-modifying	
-sorting	
-reporting	

	-selecting
	-inserting, etc
(d) Graphics	(i)Definition of Graphics
	(ii)Examples of Graphics
	packages
	-Paint
	-Harvard graphics
	-Photoshop
	-Coreldraw, etc
	(iii)Features in activating
	and existing
	Coreldraw
	(iv)Simple design using
	Coreldraw
	-Business card
	-School logo
	-National flag
	-Invitation card
	-Certification, etc
(e) Presentation package	(i)Definition of
	presentation
	package
	(ii)Examples of
	presentation package
	-MS PowerPoint, etc
	(iii)Features of
	PowerPoint
	environment
	(iv)Steps in activating
	and exiting
	PowerPoint
	(v)PowerPoint operation
	-create new
	presentation
	-insert pictures, text,
	graphs
	-animated contents

	-add new slide	
	-save presentation -run slide show	
	-print presentation	
	-close presentation	
MANAGING COMPUTER FILES		
(a) Concept of Computer Files	(i)Definition of some	
(,,	terms	
	-computer file	
	-record	
	-field	
	-data item	
	(ii)Types of data item	
	-numeric	
	-alphabetic	
	-alphanumeric	
	(iii)File structure	Differences
	organisation	among the
	(Data item—record—	organization
	file—database)	methods are
	(iv)Types of file	required
	organization	
	-serial	
	-sequential	
	-index	
	-random	
	(v) Methods of accessing	
	files	
	-serial	
	-sequential	
	-random	
	(vi) File classification	
	-master file	
	-transaction file	
	-reference file	
	(vii)Criteria for	
	classifying files:	
	-nature of	

content(program         and data)         -organisation         method         -storage medium         (i)Basic operation on         computer files         -file         using BASIC         -delete         programming         -retrieve         is required.         -insert         -copy         -view         -update         -open         -close         (ii) Effect of file         insecurity         -data loss         -data loss         -data loss         -data loss         -data loss         -open         -close         (iii) Effect of file         insecurity         -data loss         -data loss         -over-writing         -inadvertent         deletion         (iv)Methods of file         security         -use of backup         -password         -proper labelling         of storage         devices, etc         (v)Differences between         computer files and			1

of storage devices, etc (v)Differences between computer files and		-password	
devices, etc (v)Differences between computer files and		-proper labelling	
(v)Differences between computer files and		of storage	
computer files and		devices, etc	
		(v)Differences between	
manual files		computer files and	
		manual files	

	(vi)Advantages of computer files -more secure -fast to access,etc (vii)Disadvantages of computer files -expensive to set up -irregular supply	
	of electricity	
BASIC COMPUTER OPERATIONS (a) Booting and shutting down process	<ul> <li>(i) Description and types of booting process</li> <li>(ii)Types of booting process <ul> <li>-cold booting</li> <li>-warm booting</li> </ul> </li> <li>(iii)Steps involved in : <ul> <li>-booting a</li> <li>computer;</li> <li>-shutting down a</li> <li>computer</li> </ul> </li> <li>(iv)Identification of features on a desktop</li> </ul>	Difference between cold and warm booting should be treated
(b) Computer Data Conversion	<ul> <li>(i)Definition of registers, address, bus</li> <li>(ii)Types and functions of registers: MDR, CIR, SCR</li> <li>(iii)Differences between register and main memory</li> </ul>	Fetch-execute cycle is not required

(iv)Steps involved in how a computer converts data to required information (Input-Process-Output) (v)Factors affecting speed of data transfer: -bus speed; -bus width. **INFORMATION AND** COMMUNICATION **TECHNOLOGY(ICT)** (a) Communication Systems (i)What'ICT' acronym stands for. (ii) Types of ICT -Broadcasting -Telecommunication -Data Network -Information Systems -Satellite Communications -Examples of Broadcasting -Radio broadcasting -Television broadcasting -Satellite system -Examples of Telecommunication -Public Switched Telephone Network(PSTN)-Landline

	-Mobile phone systems -Circuit Switched Packet Telephone System(CSPT) -Satellite telephone system -Fixed wireless telephone system -Examples of data networks -Personal Area Network(PAN) -Local Area Network(PAN) -Local Area Network(MAN) -Wide Area Network(WAN) -Internet -Examples of Information Systems -Data Processing System -Global Positioning System(GPS)	
(b) Application areas of ICT	(i)Application Areas of ICT include the following: -Teleconferencing -Video conferencing -Telecommuting	Definition and description of these terms are required

(c)Internet

1	- 1
-Telecomputing	
-Messaging	
-Information search,	
retrieval	
and archival.	
(ii)ICT based gadgets	
and their	Knowledge on
operations	the operations
-Mobile phones	on these ICT-
-Computers	based gadgets
-Fax machines	is required.
-Automated Teller	
Machines(ATM)	
-Dispensing	
machines	
-Point of Sale	
Machines	
- Automated Cash	
Register(ACR)	
-Radio sets	
-Television sets, etc	
(i)Definition of Internet	
and some	
Internet terms:	
-Homepage	Demonstratio
-Browse	n of these
-Browser	terms through
-Chatroom	Internet
-Cybercafe	access is
-HTTP	required
-HTML	
-ISP	
-Webpage	
-Website,etc	
(ii)Types of internet	
browsers	
-Internet explorer	Access

-Netscape navigator	Internet
-Opera	through these
-Firefox	browsers.
-Cometbird ,etc	
(iii)Features of Internet	
browsers:	
-Title bar	
-Menu bar	Application of
-Tool bar	the features of
-Address bar, etc	Internet
(iv)Types of Internet	browser
services	window is
-Electronic mail (e-	required
mail)	
-e-mail discussion	
group	Benefits of
-Instant messaging	Internet to our
-Telnet	society should
-Usenet	be stressed
-File Transfer	
Protocol(FTP)	
-Worldwide	
web(www)	
-Chatting, etc	
(i)Definition of electronic	
mail	
(ii)E-mail Services:	
-sending/receiving e-	
mail	
-chatting, etc	
(iii)Steps involved in	
creating e-mail	
account	Procedure for
(iv)Steps involved in	sending and
opening mail box	receiving e-
(v)Features in an e-mail	mail is
address e.g.	required
fmemail@fmegovng.org	
	1

(d) Electronic Mail(email)Services

	(vi)Definition and steps	
	involved in chatting	
(e)Networking	(i)Definition of a	
	Computer Network	
	(ii)Types of Network	
	-PAN	
	-LAN	
	-WAN	
	-MAN	
	-Internet	
	(iii) Network topology	Differences in
	-Star	the various
	-Bus	topologies
	-Ring	should be
	(iv)Network devices	treated
	-Hub	
	-Modems	
	-Switches	Knowledge of
	-Routers	"Bridge" as a
	-Network Interface	networking
	Card(NIC)	device is
(f) Introduction to Worldwide	(v)Advantages of	required.
web (W.W.W.)	Networking	
	(i)What is the 'W.W.W.'	
	acronym stands for	
	, (ii)Brief history of W.W.W.	
	(iii)Basic terminologies:	
	-W.W.W.	
	-website	
	-webpage	
	-homepage	
	-protocol, etc	Nigeria's
	-	contribution
	(iv)Protocol	
	-HTTP	to www

	l <u>-</u>	· · · · · · · · · · · · · · · · · · ·
	-HTML	should be
	(v)Uses/benefits of www	mentioned
	(vi)Navigating through	
	websites	
	www.waeconline.org	
	-www.itbeginswithu.org	
	-www.servenigeria.com	
	-	
	www.phillipemeagwali.co	Use of HTTP
	m	and HTML
	-www.jambonline.org	should be
	(vii)Difference between	mentioned
	e-mail and website	
	address features:	
	e.g.www.waeconline.org	
	and <u>waec@yahoo.com</u>	Visits to these
	(viii)Software for web	websites are
	development	essential
	-Frontpage	
	- etc	
(g) Cables and Connectors	(i)Types of Network Cables and	Identification
	Connectors	of different
	-Cables: Twisted pair,	Network
	coaxial, fibre optic,	Cables
	telephone	Connectors
	-Connectors: RJ45, RJ11, T-	should be
	connectors	treated
	(ii)Types of Computer Cables	
	and Connector	
	-Cables:Power cables	
	Data cables	
	– Printer	
	Cable, universal serial	
	bus(USB), monitor	
	cable, serial cable	
	-Connectors: Male and	
	female	
	icitiaic	

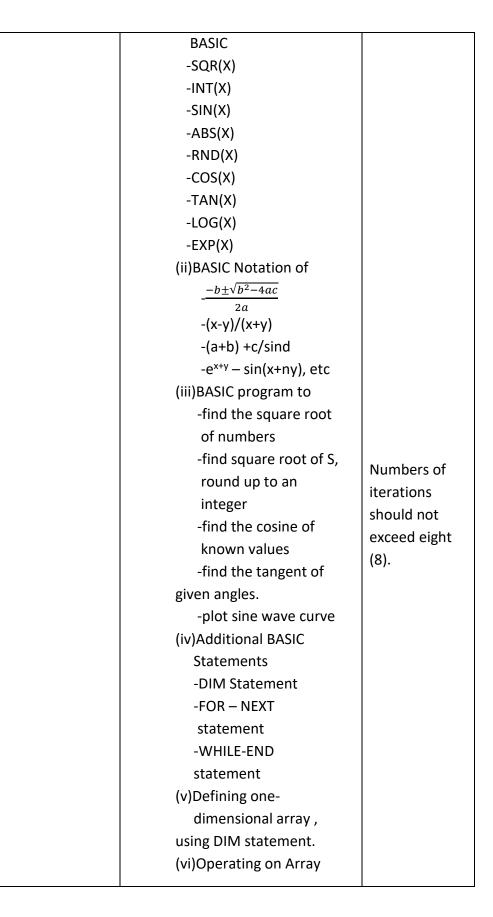

DEVELOPING PROBLEM-SOLVING SKILLS		
(a) Programming Language(PL)	<ul> <li>(i) Programming Language: Definition, examples, levels and features:</li> <li>(ii)Levels and examples of programming language -Machine</li> <li>Language(ML), e.g.100011001 -Low Level</li> <li>Language(LLL), e.g. Assembly</li> <li>Language -High Level</li> <li>Language(HLL)</li> <li>e.g. BASIC,C++, FORTRAN, etc.</li> <li>(iii)Comparison of ML, LLL, HLL.</li> <li>(iv)Advantages and disadvantages of ML, LLL and HLL.</li> </ul>	
(b)High Level Languages	<ul><li>(i) Definition and</li><li>examples</li><li>(ii)Classification of HLL</li><li>as</li></ul>	Other programming languages such as Java,
	-Scientific -Gen-purpose -Business -AI -String processing language(SPL) (iii)Features of BASIC, C, PASCAL, COBOL –	Python, etc. should be mentioned.

	Comparative study
(c)Algorithm and	(i)Definition of :
Flowchart	Algorithhm and
	Flowchart
	(ii)Functions of
	Algorithm
	(iii)Characteristics of
	Algorithm:
	-Finite
	-Effective
	-Unambiguous
	(iv)Writing algorithm
	for:
	-Computing average
	of a given
	set of numbers
	-Evaluation of
	equation:
	$y=a(b-c)^{2}/(d+2)$
	-Computing out the
	first ten odd
	numbers, etc
	(v)Flowchart symbols:
	- I/O, Process,
	decisions, etc
	(vi)Use of each flowchart
	symbol
	(vii)Flowchart diagrams for
	given programming
	problem
(d)BASIC Programming	(i)What BASIC acronym
	stands for
	(ii)BASIC characteristics

(iii)Types of data	Types of data
-variable	should be
-constant/literal	treated
-numeric	
-string/alphanumeric	
(iv)BASIC Statements	
INPUT	
PRINT, LPRINT	
LET	
END	
REM	
READ	
DATA	
(v)Arithmetic operators	
(-,+,*,/)	
(vi)Arithmetic	
Expressions	
(vii)Evaluation of	
Arithmetic	
expressions	
(viii)Simple BASIC	
Programs	Program to
	calculate
	-Area of
	triangle
	-Area of a
	rectangle
(ix)Running Simple	-Average of 3
Programs	numbers,etc
_	The simple
	BASIC program
	developed
	should be
	executable on
	the computer.
(i)Built-in functions in	

	elements	
	-Input of array	
	-Output of array	
	-Arithmetic	
	operations on array	
	(vii)Write BASIC	
	program to :	
	-store a vector of 10	
	numbers	
	-calculate the mean	
	of 100 numeric	
	values	
	-calculate area of 10	
	different	
	rectangles	
	-Compute the sum of	
	the first 100 integers	
(f) Systems Development Cycle	(i)Definition of system	
	development cycle	
	(ii)Description of system	
	development cycle	
	(iii)Stages in system	
	development	
	Cycle	
	-Preliminary study	
	-Feasibility	
	-Investigate study	
	-Analysis	
	-Design	
	-Implementation	
	-Maintenance	
	-Study review	
	(iv)Description of each	
	stage of	
	system development	
	cycle	
	(v)Diagram of system	

	development	
	cycle	
(e)Program	(i)Definition of program	Flow diagram
Development	(ii)Characteristics of a	on how a
Cycle	good	compiler and
	Program	interpreter
	-Accuracy	works is
	-Readability	required
	-Maintainability	
	-Efficiency	
	-Generality	
	-Clarity	
	(iii)Precautions in	
	developing a	
	program	
	-Be stable, steady	
	and patient	
	-No step skipping	
	-Follow order of	
	execution	
	(iv)Steps involved in	
	program	
	development	
	-Problem definition	
	-Problem analysis	
	-Flow chatting	
	-Desk checking	
	-Program coding	
	-Program	
	compilation	
	-Program	
	testing/debugging	
	-Program	
	documentation	
	(v)Description of each of	
	stages in program	
	development	
	(vi)Examples of :	

-Interpreted	
program	
(BASIC)	
-Compiled program	
(COBOL,	
FORTRAN)	

### 1. LIST OF FACILITIES AND MAJOR EQUIPMENT/MATERIALS REQUIRED:

- (1) Computer set
- (2) Laptops
- (3) Scanners
- (4) Printers
- (5) Fax Machine
- (6) GSM Phone
- (7) Memory chips
- (8) Hard disks
- (9) Flash drives
- (10) Internet connectivity
- (11) DVD
- (12) Compact disks
- (13) Cables (power and data)
- (14) Word processing packages, database package, BASIC program and CorelDraw
